Summary

I develop and optimize layouts for adaptive sites, also maintain existing projects. I always make sure to check the results of my work for cross-browser compatibility, download speed and validity.

My list of completed projects includes 100+ sites performed at various levels of complexity. More information about some of them is available on my site (<http://odinokun.com>) and on my Github page (<https://github.com/Odinokun>)

Open for Front-end Developer Position

I consider both full time and part time office employment (Kyiv, Ukraine), remote cooperation is also possible.
